## INTRODUCTORY

The aim of this work is to give a complete and accurate index to the public and private educational system of the United States. The information has been thoroughly revised to date, and before final printing of the book, proofs submitted to the various school officials for final revision and correction.

In the main *Geographical Classification*, in addition to the public school officials, will be found a complete list of all schools and colleges, together with information as to the kind of school, class of students admitted, religious denomination, year established, and the name of the governing head of the institution. A second complete list of all institutions is given in the *Classified Directory* in which the schools are arranged alphabetically by states, classified according to the kind of school, giving a ready reference or complete list of any particular class of institution, together with the names of the executive officers. A complete *Alphabetical Index* of all schools and colleges will be found at the back of the book from which any institution may be instantly located.

The *Public School System* is fully covered by lists of the state educational officials and county superintendents of schools, the city boards of education, city superintendents, public high schools and principals, and the directors and supervisors of special subjects. A list of the more prominent *Libraries* with the name of the librarian and number of bound volumes, is included in the present volume. An *Educational Business Directory* is also given, which will be found

of much value to the school executive as a convenient and ready reference list of reliable manufacturers and dealers supplying every known need of the school and college.

It is believed the work will be found of value to every one in any way associated with educational institutions, or engaged in educational work. Acknowledgment is made to the various State and City Superintendents of public instruction, private school officials, librarians and others for their kind co-operation and assistance in furnishing data and information necessary for the completion of the volume. While no labor has been spared in the effort to have the work as accurate as possible at the time of going to press, continual changes necessarily preclude absolute accuracy.

School officials, librarians and others will confer a favor by notifying us of changes, and by calling our attention to any inaccuracies or omissions in any department of the work.

THE PUBLISHERS.

## COUNTY SUPERINTENDENTS OF SCHOOLS

Maine has no county superintendents of schools, but has what is known as the "Union Systems" of school supervision. The towns and cities of the state, of which there are 517, are combined into groups by the State Commissioner of Education, and the members of the school committees of the towns in these groups elect one person to serve as superintendent of schools of the group or union, devoting his whole time to that work. The only exception to this arrangement is in the case of towns or cities having more than seventy-five teachers. These are allowed to elect a Superintendent of Schools to serve that town or city alone.

## SUPERINTENDENTS OF SCHOOLS

Vermont has the town system of schools. The schools of the state are chiefly under the direction of superintendents who give their full time to this work. Any town or city may elect a town superintendent or may combine with other towns in a supervisory district. The superintendents of these districts are elected by the local directors subject to approval by the State Board of Education.

#### **BALANCES**

The common balance consists essentially of a beam resting at its middle point upon a fulcrum and furnished at its extremities with two scale pans; the goods to be weighed are placed in one of these, and known weights placed in the other until the beam assumes a horizontal position. In most of the delicate balances

used for chemical analysis, the distance of the center of gravity from the fulcrum can be regulated within small limits. Such balances are protected from air currents, dust, etc., by being enclosed in glass cases with sliding fronts. See, Laboratory Equipment.

#### **BAND AND ORCHESTRA INSTRUMENTS**

## BATHING SUITS AND APPAREL

Swimming pools are a necessary adjunct to the modern school, and bathing suits or the students constitute an item which must be given consideration in the school purchases. Many schools furnish the bathing suits for the students, laundering and sterilizing after use. Where students furnish their own apparel the purchases are often made through the athletic department of the school.

#### BLACKBOARD ERASER CLEANERS, ELECTRIC

These machines are driven by a motor and operate on any electric current by plugging in on a convenient lamp socket. A strong suction fan carries the dust from the eraser to the dust bag, which is so attached that it is impossible for dust to escape into the room.

#### BLACKBOARD CLEANERS, FELT

A blackboard eraser should clean the board thoroughly without noise or dust. Numerous types are offered by the different manufacturers.

#### BLUEPRINT FRAMES

These frames are similar in construction to a photograph printing frame except that they are much larger. The majority of them rely on the sun's rays for printing. There are some, however, known as vacuum frames, that are adaptable to either sun rays or electricity.

**Dietzgen Co., Eugene, Chicago, New York San Francisco, New Orleans.**  
See announcement on page 961

#### BLUEPRINT PAPER

This paper is a specially prepared sensitized paper. When tracings are placed in contact with it and exposed to light rays, the drawings will be reproduced on the paper in white lines with a blue background after the paper has been developed by immersing in clean water.

#### BLUEPRINTING MACHINERY

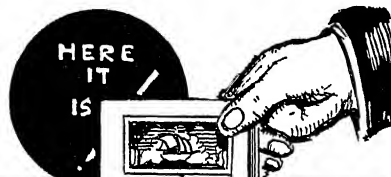

There are two types of blueprinting machines, the cylindrical which are made in both continuous and non-continuous, and the horizontal which are all continuous. The cylindrical machine consists of two segments of curved plate glass. The tracing and paper is kept in contact with these plates by means of roller curtains. When printing an electric arc lamp is lowered into the cylinder. The horizontal machine is motor driven, the tracings and paper being fed in by means of belts onto the printing surface which is lighted by arc lamps. Schools offering courses in drafting, shop work, and where it is necessary to have a large number of blueprints, have a need for such machines.

## BOOKS

School boards and teachers are convinced of the advisability of providing for pupils' supplementary reading, and the number of adequate school libraries is constantly increasing. New books must be added to these libraries regularly if they are to be popular with the children. Boys and girls should be encouraged to think of books as part of the joy of life, and reading in no sense a duty.

A large changeable bulletin board used in school buildings of the larger type where it is necessary or desirable to have some method of directing visitors to executive offices, classrooms, libraries, museums, or individuals.

**Tablet and Ticket Co., The,**  
Chicago, New York, San Francisco.

## BULLETIN BOARDS

Notices displayed on a bulletin board will often receive attention where important verbal announcements sometimes fall on inattentive ears. See, Bulletin Boards, Changeable; also, Bulletin Boards, Cork.

## BULLETIN BOARDS, CHANGEABLE

These boards are being made in several different types. In one type the letters, which are die cut, can be had in various sizes and colors and these letters are held on to the board by tabs which fit into slots. Another type uses letters which are printed on individual cards and which fit into slides in the board. Their usefulness lies in the ease with which bulletins may be changed or altered at will.

## COMPASSES

Instruments for describing arcs and circles, or for measuring distances. They consist of two legs joined together at one end by a hinged joint, and having one leg furnished with a pen or pencil. Compasses are divided into common, spring, beam and proportional compasses, according to their kind. Triangular compasses have three legs, so that the three points of a triangular may be transferred at once. Hair and bow compasses are additional varieties. See, Drawing Instruments.

## CRUCIBLES

Open vessels used for melting and calcining substances which need the application of extreme heat, such as metals, ores, glass, etc. They must be made of some infusible, unbreakable substance. Those made of fire-clay and coarse sand is the commonest kind. For analytical purposes platinum and porcelain are much used. Lime or carbon crucibles will withstand the highest temperatures. See, Laboratory Equipment.

## CURTAINS, STAGE

School auditoriums equipped for any form of theatricals or entertainment require a stage curtain. These curtains are made to order and can be had either in the type used by theatres, or in the form of a drape made from velour or other heavy fabric.

## TRADE INDEX

**DEODORIZERS**

This equipment is a means of destroying bad odors in a room or building. Some of the types actually spray a deodorizing chemical into the air, while others allow the material to evaporate and mix with the air in the room. They are especially valuable in large school assembly rooms where there is danger of the air becoming stale.

**DESKS**

The school desk or chair plays an important part in the shaping of the physical body during the formative stage of school life. A comfortable position for both teacher and pupil must be the background for all sustained mental effort. See, Desks, Pupils; also, Desks, Movable Chair; also, Desks, Teachers.

## DO YOU KNOW?

Pitman Shorthand was invented by Isaac Pitman in 1837. The excellence of the Pitman System is indicated by the fact that today—90 years after—9 out of every 10 reporters are Pitman writers.

More than 1,400 reporters were members of the National Shorthand Reporters' Association in 1926.

Nearly 1,300 of this number write Pitman.

Less than 150 use one of 11 different systems.

The Highest and Best Paid Positions Are Awarded to Pitman Writers.

**DRAWING BOARDS AND TABLES**

Drawing boards should be so constructed as to eliminate any possibility of warping out of square. Some boards are unmounted which may be used any place, while others are mounted in some manner. The mounted boards may be arranged so as to be folding or stationary. The stationary boards are made with iron or wood pedestals, and in some cases are provided with drawer space to take care of instruments, paper, and other materials.

These fountains are of the bubbling type, and are manufactured in pedestal and wall design. Where the water does not need to be purified they are attached direct to the water supply pipes. In case filtration is needed, the filter is attached to the supply pipes and the fountain operated from the filter. Sanitary drinking fountains are being installed in modern school buildings, on the playground and the athletic field, as they provide pure, fresh, clean water at all times, and in addition prevent the spread of contagion arising from germ-laden mouths.

## Self-Releasing

### Fire and Panic Exit Latches

VON DUPRIN Self-Releasing Fire and Panic Exit Latches are so simple in design, so sturdily built, so dependable in operation that they have become standard equipment on the school house doors of most of the larger American cities and many of the smaller ones.

Their high quality and reliability gives them such freedom from trouble and from servicing expense that their cost per year is surprisingly low.

**FENCES, SCHOOL**

In addition to added property protection and ornamentation, fencing the school yard and playground will be found a wise precaution for safeguarding school children. A substantial fence and gates keep the children within bounds, bar intruders at all times, control admission, and lessen the burden of supervision. Special fences are likewise essential for the tennis court, campus, and athletic field.

## ***Food Supplies for Educational Institutions***

The institutional buyer demanding value insists that to have value quality must be maintained. This uncompromising attitude has resulted in careful and scientific analyses. It has developed a fine appreciation of the economy of better foods. Better foods mean increased efficiency and more satisfied guests and pupils.

Fifty years of specialized service in the supply of Hotels, Restaurants and Institutions has enabled us to know something of the problem confronting institutional buyers. Out of this knowledge and cooperation, we have evolved an assortment of foods particularly suited to their individual requirements. Our Edelweiss label has become the symbol of fine foods economically packed.

Sexton special quotations are mailed each month to the institutions of America and offer the very latest values on merchandising suitable to the particular requirements of the exacting clientele serviced by Sexton. Wherever close and intelligent buying prevails, our prices are received with interest. Please write us if you are not receiving them.

*America's Largest Distributors of No. 10 Canned Foods*

P. O. BOX-JS, CHICAGO

66 IMLAY ST., BROOKLYN

If you went into the finest garden and selected the vegetables to serve your pupils you could find no better than those which come to you packed under the Edelweiss label. Each vegetable distributed by Sexton is selected where soil and climate are best suited to its perfect production. Picked at just the right time, and packed on the spot, they reach you retaining all the vitamin value, full flavor and succulence of the fresh vegetable.

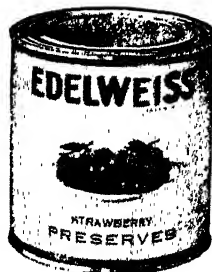

All of Sexton's Canned Fruits are equally delicious. All are allowed to completely ripen in the sun before being picked. Each fruit is obtained from the locality where it grows best—and then only the choice of the crop is taken. Packed in No. 10 tins, the container most economical for school cafeteria use.

Delicious Edelweiss preserves, jellies, marmalades and fruit butters, made in Sexton's Sunshine Kitchens, are of excellent quality because the materials from which they are made—selected fruits and cane sugar—are the finest obtainable. They are made with great care, in small quantities, giving them the beautiful color and the delicious appeal of home made preserves. In our Sunshine Kitchens we also prepare a complete assortment of pickles, relishes and condiments of quality. Edelweiss quality mayonnaise dressing, catsup, mustard and chili sauce packed in handy gallon glass bottles.

Among other Edelweiss Foods particularly popular with school cafeterias are: Individual tea, cocoa, gelatine dessert, chocolate pudding, peanut butter, macaroni, spaghetti, canned fish, paper napkins and paper specialties, Edelweiss No. 10 cans soups, dried fruits and tapioca.

# How Do You Buy Cleaning Tools ?

On a Price Basis or  
Labor-Saving Basis?

Holcomb cleaning tools are not manufactured to sell at a price—they are designed to save labor. For 36 years Holcomb has experimented and perfected cleaning devices and *today*—almost 70% (seven out of ten) of the schools and colleges of the country are using Holcomb Cleaning Tools.

*We are endeavoring to war-  
rant this Year After Year  
Nation Wide Patronage.*

As labor takes 95 cents of your cleaning dollar, you need the correct cleaning tools to reduce this cost. Only 5 cents are spent for supplies. There is a Holcomb cleaning tool for every cleaning job that will do the work more efficiently, thereby reducing both the labor and material costs.

## LATHES

Lathes for school shops are of two types; those for metal working and those used in the woodworking courses. The metal-working lathes used by schools include the speed lathe, the engine lathe, and the turret lathe. The engine lathe is probably the most used since all work such as turning and screw cutting is done on it. The turret lathe, which is used for multiple operation work will be found only in schools teaching advanced machine shop courses. The speed lathe is used almost exclusively for small operations such as polishing, etc.

## ANATOMICAL MANIKIN

Every College and School Should  
Have These Manikins

A Manikin is a complete, lithographed reproduction of the human body. It hangs upon the wall when closed, occupying the space of a picture. Open it, and fold after fold you turn just as you would turn the pages of a large book. So you pass from the skin to the skeleton. You see, in its natural colors, life size in exact position, every vein, nerve, muscle, organ and bone in the body. The name of any one of these can be learned in a second by referring to the volume which goes with every manikin in which the 455 numbered parts are indexed. All anatomical facts are before you for reference and demonstration.

Life Size, 5 ft. 5 in. high. 455 parts, 30 folds  
Male \$18.00 Sexless \$18.00  
Female \$21.00 (with obstetrical supplement)  
Sent on receipt of N. Y. check or C. O. D.

## DURABILT GYM LOCKERS

*Save and Beautify—with steel*

### GYM LOCKERS

The efficient gym locker arrangement illustrated consists of one large locker for street clothing and six small lockers for gym suits, togs, etc. This arrangement could be varied by adding small lockers in double or triple tiers. The doors are usually equipped with padlocks. Write for descriptive literature and prices.

### SHOE LOCKERS

Shoe Lockers, either single tier or double tier are often recessed in the gymnasium walls, or stood in an adjacent room where they are accessible to gym class members who may require only shoe storage.

Shoe compartments are usually 6"x6" but other sizes that work out in proper multiples can be furnished. Write for further information and prices.

# Graphing the School Report

In presenting this School Report we have followed the lead of Big Business. More and more, each year, Business is dropping statistics and using the Graph Line to drive home their story.

This report has the advantage of graphically indicating the standing of the student far more forcibly than a mere tabulation of the numerical percentages would indicate, whether the change is an advance or a decline.

Line 75 (the danger line) printed in red

## METRONOMES

Used by music students for indicating and marking exact time. The device consists of a pendulum driven by a spring and wheel which ticks the oscillations. The period of the pendulum's vibration can be varied to any required time by the shifting of a movable weight, a graduated scale showing the number of oscillations per minute. See, Music and Music Supplies.

## MICROMETERS

Instruments for measuring accurately very small angles or spaces, and are generally used in connection with a microscope or telescope. They are made in a great variety of forms, but in nearly all types the measurement is made by turning a very fine screw, which gives motion to a scale, lens, or ruled glass plate. See, Surveying Instruments.

## MICROSCOPES

Microscopes for school work have considerable variance in quality and precision depending entirely upon the work for which they are to be used. They can be secured having a magnifying power from thirty or less diameters up to a thousand diameters. In the simple microscope a single convex lens, between the eye and the object, forms an enlarged image. In the compound microscope an object glass or objective, near the object, forms a real image, which is viewed by the observer through a magnifying eyepiece. Either objective or eyepiece, or both, may be composed of more than one lens.

## TYPEWRITER . DIN ♦

There are two kinds of typewriters.

The kind in which each key whangs the paper with a resounding whack.

(That's a hammer-blow typewriter.)

And the other kind . . . the pressure-printing typewriter, each key kissing the paper silently.

(That's a REMINGTON NOISELESS.)

For the relief of your teachers' and pupils' nerves, for the sake of their health and efficiency, equip your classrooms with the Remington Noiseless.

## PIANOS

Pianos are a necessary part of all school equipment, every school building being provided with one or more instruments. Schools having an auditorium should provide a grand piano. In schools where piano lessons are given, each practice room must have an instrument. In the grade schools a special small sized piano which can be moved from room to room is often used. This piano is also low enough that the teacher can see over the top of it and direct the singing of the class while playing.

# PUBLIC ADDRESS SYSTEMS

Large indoor and outdoor audiences frequently require a public address system in order that they may hear distinctly and plainly every event on the program. In stadiums, parks, and athletic fields, these systems are used to report results, make announcements, and entertain. Proper systems can also be installed in halls and auditoriums to correct acoustical difficulties.

**SEATING EQUIPMENT**

The school hours have a vital effect on the health of both pupil and teacher. Incorrect seating makes the children slump down in their chairs, causing bent backs, crowded abdomens, and stooping shoulders, while correct seating encourages correct posture and builds enduring habits of health. # WHAT IS IT WORTH TO YOU--

**T**O know that the stage requirements of your auditorium will be thoroughly understood; that the same genius which created practically all the outstanding developments in stage equipment and rigging during the last quarter of a century is applied to the problem of originating equipment for your individual stage.

**A**ND to know also that all equipment installed is guaranteed and will maintain its initial efficiency throughout the period of its use.

**T**HE value of such service cannot be measured or compared. Yet, it costs nothing. For in PETER CLARK, INC., installations you pay only for the equipment and the cost of installing it.

**P**RODUCTS: Complete Stage Rigging for Schools, Colleges, Auditoriums; Stage Hardware; Asbestos, Fire and Sound-proof Curtains; Draw Curtain Tracks; Electric Curtain Machines; Portable Motion Picture Booths; Portable Bleachers; Sectional Grandstands; Stage Draperies and Curtains.

**STATUARY**

Statuary furnishes educational and illustrative material for several departments, from ancient history to art, and it serves as a practical use when given to the school as a memorial from classes and organizations. Very good reproductions of well-known "originals" are furnished in marble, bronze, or composition. When determining the material from which the statue shall be made, purchasers should consider the usage to which it will be put, whether it will be a feature of the exterior or interior of the school building, and whether it will be used as subject matter for art or other classes.

# ... How to make YOUR FLOORS

*Beautiful and lustrous while  
cutting maintenance costs 1/2*

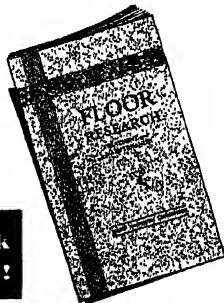

**CAR-NA-VAR** is a scientific combination of varnish gum and waxes. It gives a beautiful, lustrous, yet non-slippery finish to wood, linoleum, mastic, concrete, cork, etc. . . . protects the surface indefinitely from wear . . . and cuts maintenance costs as much as 50%. Comes in "natural" and popular colors. Applied with a mop—ready for traffic in an hour.

**RUBBER-VAR** is a special treatment for rubber, soft composition and light colored terrazzo floors. Gives same desirable results as Car-Na-Var. It's waterproof.

Every person interested in the efficient and economical maintenance of floors should have a copy of "Floor Research". Written by a nationally known floor consultant. Write today for a free copy.

ALLOTMENT IS AN IMPORTANT FACTOR, FIND  
THIS TIMER A NECESSITY

*The Santa Rosa High School says:*

"The Interval Timer which we received from you recently is more than you claim for it. We use it several periods a day for our typing students and the teachers are enthusiastic in praising it — emphasizing particularly the freedom it allows them to carry on their other work while the classes are pursuing the five, ten, and fifteen-minute tests. We can't understand how we got along without it thus far."

**NOT A CLOCK**—*The mechanism is designed solely for the purpose of measuring any given time period within the range of 15 seconds to 2 hours, and sounds alarm at the expiration of that interval. The absence of complicated gears results in simplicity and sturdiness.*

Athey shades have been installed in many hundreds of schools. They are essential because there is perfect light control which is particularly important in schools, thus eliminating eye strain. They function as an automatic ventilator, they are never touched with the hand, they are good for 10 years of service and hence economical, and very attractive in appearance. Circle heads may be treated with sunburst shades.

The cloth is a herringbone woven coutil, 200 threads per square inch, guaranteed sunfast, pleated to  $1\frac{5}{8}$ ", stitched at each fold and made in 7 colors. They raise from the bottom and lower from the top, sustained at each side by strained brass wires as shown by the sectional cut. The cord case at the head is a steel channel with brass rollers for the cords, both the wires and cords passing through perforations in the cloth.

This skylight installation is in one of many school installations in Cleveland, two large skylights operated in unison with an endless woven wire cable diverted over ball bearing shives, which leads to a winch back stage. The principle in operation is the same as the vertical shade except that it operates horizontally, sustained on taut wires by brass clips at each fold of the cloth. When moving pictures are shown the collapsed shades emerge from the pockets which conceal them and disappear in like manner when not in use.

### Cloth-Lined Metal Weatherstrip

Is produced solely by this company and is the only weatherstrip which prevents the infiltration of dirt as well as cold air, and the same method is used in treating metal windows.

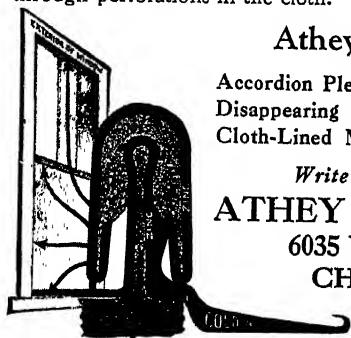

The City Sanitarium of St. Louis, the largest hospital in the country, was weatherstripped two years ago. They report that the first winter they abandoned one 350 hp. boiler, saved \$10,500 in coal plus the cost of stoking this extra coal and removing ashes, and cancelled a \$2,000 order for blankets.

## School men should consider pennies by saving vs. dollars by economy

It is shortsighted to lavish equipment on one department at the expense of another. But how much economy will plumbing and heating stand? Certainly by purchasing inferior materials efficiency is not only lowered, but the health of children is endangered. Then, too, it is an experiment that is paid for by increased maintenances, costly repairs and expensive replacements.

Crane engineers have studied this problem. They are prepared to offer a solution to it . . . to lower the cost of plumbing and heating systems without endangering either efficiency or the building budget. Already they have done it for numberless schools throughout the country. If you will drop into the nearest Crane Exhibit Rooms, you will be shown how they can do it for you.

Philosophically, this development in high school athletic games means more enjoyment for more people, since the leisure hours of most adults are confined to the evening.

Installation of equipment is merely a matter of days. The cost of current is negligible, and Benjamin equipment pays for itself in a short time by the increased attendance.

Benjamin equipment meets the needs of the various types of athletic fields. Write for data sheets.

## Jacobsen 4-Acre Power Lawn Mower

### Beautiful School Lawns At Lower Cost

WELL kept school lawns, buildings and equipment are important in moulding the ideals and habits of the student. There is a Jacobsen model for every lawn, large or small.

The Jacobsen 4-Acre Heavy Duty Mower is used by the largest colleges and universities. With or without riding sulky it will cover more ground per day than any other mower of same size, and with a lower upkeep cost than any other walking-type power mower. It has a 24-inch reel, an enclosed gear drive, auto-type differential, separate clutch control

of traction and cutting unit, self-sharpening reel and other outstanding refinements. A Sickle-Bar clipping attachment may be had which clips dandelions and other weeds at the same time the lawn is mowed.

The "Junior" Power Mower is a quality Jacobsen Product with a 19-inch cutting reel. Suitable for moderately large lawns--particularly efficient on terraces.

### FREE Demonstrations

A trial demonstration given on request, without obligation.  
Write for free book, "Lawns Beautiful."

## Consider these exquisite matters

WONDROUS fruits, tender as rose petals — fruits plucked at the precise moment in which they attain their dew dappled perfection. Sealed in their neat containers in bright clear syrups without loss of even a whisper of their field-fresh flavor.

Such are Richelieu and Ferndell and Batavia fruits—selected and prepared to epicurean standards and priced to average pocketbooks.

Vegetables saturated with the freshness of fragrant fields

at dawn, with flavors that send little ripples of “Oohs” and “Ahs” coursing around the dinner table—so incomparably fine that we contemplate them with reverence.

You will find more than 500 different Richelieu and Ferndell and Batavia foods—each one identical, no matter which label you buy them under. Each one prepared from our own special recipes, using only the very finest varieties of each fruit and vegetable and ingredient.
